

MatriGRAFT®

Femoral Heads & Humeral Head

Clinical Overview Femoral and humeral heads, designed to provide immediate structural support to restore segmental bone loss or to be ground into cortical/cancellous chips

- Applications**
- Joint Arthroplasty
 - Fracture Management Creating
 - Custom Wedges or Segments
 - Filling Osseous Defects
-

- Why Use**
- **Osteoconductive:** Natural bone matrix facilitates cell attachment and proliferation, and vascular in- growth
 - **Structural:** Cortical wall provides immediate structural support
 - **100% Human Bone:** Can remodel with a patient's own tissue during the healing process
 - **Sterile:** Sterilised using patented and proprietary Allowash XG® technology which provides a sterility assurance level (SAL) of 10⁻⁶, without compromising the graft's inherent osteoconductive properties¹
 - **Convenient:** Implant is pre-sized to fit a variety of applications and minimise prep time in the operating room
-
