

OrACELL[®]

Acellular Dermis

Clinical Overview An acellular dermal matrix used for soft tissue reconstruction in periodontal defects and ridge preservation

Applications

- Guided Bone Regeneration: Extraction Socket, Ridge Augmentation, Sinus Augmentation
- Soft Tissue: Root Coverage, Insufficient Attached Gingiva

Why Use

- **Safe** – Sterile, with a Sterility Assurance Level (SAL) of 10^{-6}
- **Decellularised** – Uses Matracell[®] technology to remove DNA and cellular remnants to decrease likelihood of an immune response
- **Biocompatible** – $\geq 97\%$ of DNA removed and retains natural growth factors, collagen and elastin
- **No re-hydration needed** – Supplied pre-hydrated, ready-to-use
- **Convenient storage** – Room temperature (15°C to 30°C)
